

1. Présentation de la progressivité

Ce document permet de couvrir les 8 semaines de la première période en proposant une progression structurée en trois grands blocs d'apprentissage. **Les semaines 1 à 3** installent le concept d'égalité d'addition/soustraction en augmentant progressivement la taille des nombres. **Les semaines 4 et 5** introduisent la multiplication (tables de 2 à 10) puis son croisement avec l'addition et la soustraction. Enfin, les **semaines 6 à 8** complexifient l'analyse en positionnant le trou du côté des opérations (recherche de multiples, mélanges d'opérations et sommes de 3 termes).

2. Analyse détaillée : Cohérence et Progressivité**Bloc 1 : Additions et Soustractions (Semaines 1 à 3)**

- Semaine 1 : Nombres inférieurs à 100, résultats simples
- Semaine 2 & 3 : Augmentation de la taille des nombres (jusqu'à 300)
- Variabilité des positions : Le nombre manquant alterne très bien entre le membre de gauche et le membre de droite.

Bloc 2 : Introductions de la Multiplication (Semaines 4 et 5)

- Semaine 4 (J1-J3) : Égalités d'équivalence entre deux multiplications
- Semaine 4 (J4) à Semaine 5 (J3) : Croisement multiplication avec addition/soustraction
- Semaine 5 (J4) : Inversion de la structure, le trou passe à gauche

Bloc 3 : Multiplication de dizaines, réinvestissement et sommes multiples (Semaines 6 à 8)

- Semaine 6 (J1-J3) : Calculs complexes avec $100 - \dots\dots\dots = a \times b$
- Semaine 6 (J4) & Semaine 7 (J1-J3) : Le trou se trouve dans le facteur de la multiplication
- Semaine 7 (J4) à Semaine 8 (J2) : Introduit les multiples de 10
- Semaine 8 (J3-J4) : Mix complet d'opérations et égalités à 3 termes à gauche
